Health Psychology Charles Abraham, Mark Conner, Fiona Jones, Daryl O'Connor, 2016-04-14 The new edition of *Health Psychology* is the perfect introduction to this rapidly developing field. Throughout the book, the psychological processes that

shape health-related behaviours, and affect core functions such as the immune and cardiovascular systems, are clearly explained. These relationships provide the foundation for psychological interventions which can change cognition, perception and behaviour, thereby improving health. The book is split into five sections, and builds to provide a comprehensive overview of the field: the biological basis of health and illness stress and health coping resources: social support and individual differences motivation and behaviour relating to patients Extensively revised to include new material on behavioural change, the role of stress, resilience and social support, recovery from work, and the care of people with chronic disease, the book also includes a range of features which highlight key issues, and engage readers in applying what we have learned from research. This is essential reading for any undergraduates studying this exciting field for the first time, and the perfect primer for those embarking on postgraduate study.

Health Psychology: Topics in Applied Psychology Charles Abraham, 2017-07-28 Topics in Applied Psychology offers a range of accessible, integrated texts ideal for courses in applied psychology. The books are written by leading figures in their field and provide a comprehensive academic and professional insight into each topic. They incorporate a range of features to bring psychology to life including case histories, research methods, ethical debate and learner activities. Each chapter opens with learning objectives to consolidate key points. A reading list and sample essay questions at the end of chapters enable further independent study. The series also offers an appreciation of multiple perspectives, examines the relationship between psychology and other cognate disciplines and discusses recent developments in each field. Topics in Applied Psychology will provide you with the tools you need to engage with, enjoy and understand your applied psychology discipline, ultimately ensuring confidence and success in exams as well as a comprehensive grounding in the profession. Health Psychology guides the reader through core issues in health psychology research and practice. Each chapter builds on previous ones so that the text provides an overview of the field rather than presenting a compendium of topics. The book discusses mechanisms, models and methods and examines how biological, cognitive, affective and social processes impact on health and illness. It also explores how stress and coping mechanisms affect health behaviours and the psychological determinants of health behaviour. Two chapters focus on how psychological research can be applied to change health-related attitudes and behaviours. Communication between the patient and practitioner is examined as is the role of the health psychologist. The integrated and interactive approach, combined with the comprehensive coverage, make this book the ideal companion for courses in health psychology. Other books in the series include: Clinical Psychology, Criminal Psychology, Educational Psychology, Organizational and Work Psychology and Sport and Exercise Psychology.

Health Psychology, 2nd Edition Deborah Fish Ragin, 2015-07-22 A truly interdisciplinary approach to the study of health, *Health Psychology: An Interdisciplinary Approach* uses the social ecological perspective to explore the impact of five systems on individual health outcomes: individual, culture/family, social/physical environment, health systems and health policy. In order to provide readers with an understanding of how health affects the individual on a mental and emotional level, the author has taken an interdisciplinary approach, considering the roles of anthropology, biology, economics, environmental studies, medicine, public health, and sociology.

Handbook of Adolescent Health Psychology William T. O'Donohue, Lorraine T. Benuto, Lauren Woodward Tolle, 2014-07-08 Adolescence is a pivotal period of development with respect to health and illness. It is during adolescence that many positive health behaviors are consolidated and important health risk behaviors are first evident; thus, adolescence is a logical time period for primary prevention. In addition, the predominant causes of morbidity and mortality in adolescence are quite different from those of adults, indicating that early identification and treatment of adolescent health problems must be directed to a unique set of targets in this age group. Moreover, because of the particular developmental issues that characterize adolescence, intervention efforts designed for adults are often inappropriate or ineffective in an adolescent population. Even when chronic illnesses are congenital or begin in childhood, the manner in which the transition from childhood to adolescence to young adulthood is negotiated has important implications for disease outcomes throughout the remainder of the person's life span. Organized in five major sections (General Issues, Developmental Issues, Treatment and Training, Mental Health, and Physical Health) and 44 chapters, *Handbook of Adolescent Health Psychology* addresses the common and not so common health issues that tend to affect adolescents. Coverage includes: ■ Context and perspectives in adolescent health psychology ■ Health literacy, health maintenance, and disease prevention in adolescence ■ Physical disorders such as asthma, obesity, physical injury, and chronic pain ■ Psychological disorders such as substance abuse, attention deficit hyperactivity disorder, depression, and eating disorders ■ Congenital chronic diseases such as type 1 diabetes and spina bifida *Handbook of Adolescent Health Psychology* is the definitive reference for pediatricians, family physicians, health psychologists, clinical social workers, rehabilitation specialists, and all practitioners and researchers working with adolescents.
